

## PRODUCT OVERVIEW

The Rocker is a mid-line attachable device which can be used for a range of applications. The Rocker is 'self-tailing' and can be used hands-free, during ascent and descent. The Rocker is fitted with a thumb catch which can be engaged to 'park' the device in a stationary position on the rope. The Rocker is designed for use without a shock absorber.

The ISIC Rocker is a multi-use rope access and technical rope rescue back-up device. The Rocker can be used as a Back-up device in a twin line rope access type system, a fall arrester on a vertical flexible line, as a rope adjuster in a work restraint system, or as Ropegrab in a hauling or tensioning system.

## TECHNICAL INFORMATION

Part Code	RP500
Dimensions	65 x 111 x 30mm (2.6 x 4.4 x 1.2")
Weight	169g (6oz)
Rope Diameter	10.5-11mm (0.4")
Maximum User Weight	150kg (330lbs) [see User Instruction Manual for EN12481 Rescue Load information]
Body Material/finish	Aluminium/Anodised
Cam Material/finish	Aluminium/Hard Anodised
Standards	EN 12841:2006-A, EN353-2:2002, EN358:2018
